

## PRODUCT ATTESTATION

# Cyber Security

This attestation confirms that satisfactory evidence has been established, through applicable methodologies, that the requirements set out in the listed standard(s) and applicable Nemko procedures have been met. The attestation scheme is managed by Nemko AS according to the requirements of ISO/IEC 17065.

The conformity assessments are based on the documentation and information provided by the customer about the listed product(s). This attestation covers the tested product and any subsequent identical products. There is no periodic audit connected to this attestation; hence there is no defined validity period.
