

Home Motion Sensor

The wireless Zigbee Motion Sensor has a small form factor. Connects to any Zigbee based Home Automation system. Use the Motion Sensor to control lighting or other Smart Home equipment.

The new standard for Motion Sensor

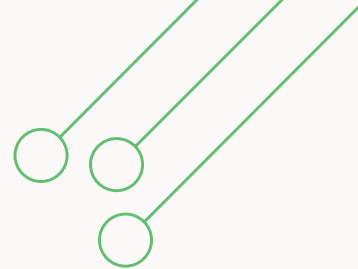

Datek Motion Sensor is equipped with motion detection and temperature sensor. An advanced motion sensor with adjustable sensitivity threshold.

The Motion Sensor updates over the air (OTA).

Design customization and branding

It has become evident that design and branding heavily affects the market of electronics. We therefore offer customization to suit your brand recognition.

Home. Connected.

Specifications

Power Source

Battery: CR 2450

Local Communication

Radio Protocol: Zigbee 3.0, supports HA 2.1
Frequency: 2400-2483,5 MHz (IEEE 802.15.4)

Environment

IP Class: IP20 (Indoor use)
Operational temperature: 0 to +40 °C
Shipping/storage temperature: -20 to +45 °C
Humidity range: 0 to 90% R.H. (non-condensing)

General

Dimensions: L:43 W:43 H:34 (mm)
Bracket (supplied with unit): Tilt and corner mounting
Upgrade method: OTA (Over The Air)

Embedded temperature sensor

Adjustable sensitivity levels through app
(requires support in app)

Low battery warning
LED indicator and pairing button
Supervision enabled
Tamper

Functionality that depends on support in
your Hub/App
Sensitivity adjustment
